

# Elroy “ Roy ” Phillip — Full Technical Résumé

## Summary

- Cloud Engineer & Systems Administrator with 10+ years across AWS, Linux/Windows, networking, automation, IaC, and broadcast engineering. Founder of WEP Global Tech (WEPTG).

## Core Skills

- AWS (EC2, VPC, IAM, Lambda, CloudWatch)
- Terraform & Infrastructure as Code
- Linux/Windows Systems Administration
- Active Directory, Group Policy
- Networking: VLAN, VPN (WireGuard), MikroTik, Ruckus
- Automation: Bash, PowerShell, Python
- Docker, Node.js, Prisma, SQL

## Experience

- Founder – WEPTG (2023–Present): Cloud architecture, VPC/IAM design, monitoring pipelines, remote access solutions, network engineering, and custom Node.js applications.
- IT Systems Administrator (2015–2023): AD, Windows Server, VPN, patching, firewalls, enterprise support.
- CNN/Warner Media (2008–2015): Broadcast IT, routing, control-room systems, uptime-critical support.

## Projects

- Cloud Application Dashboard (C.A.D.) — AWS serverless monitoring platform.
- R.A.T. Security Reporting Platform — Node.js, Prisma, PDF automation.
- Home Enterprise Network — CCR1036 router, VLANs, WireGuard, AP deployments.

## Certifications

- AWS Certified Cloud Practitioner
- Linux Foundation Certified SysAdmin (LFCS)
- CompTIA A+, Network+, Cloud+
- AWS Solutions Architect (In Progress)

## Education

- B.S. Information Technology (Systems & Networking), DeVry University
